

Cyber Liability

Protection against viruses, hackers and other cyber risks

Adler Insurance Brokers can offer your business protection against internal and external cyber-attacks – invaluable protection in today's digital age.

Our cyber liability insurance product provides a comprehensive digital protection solution. We can provide forensic investigation and data recovery services to help deter, detect and recover from misuse of IT equipment and theft or corruption of digitally held intellectual property.

Internet and networked technologies have changed many aspects of how business operates. While the benefits of using Internet-based and other technologies are numerous, so are the inherent risks, creating exposures that were virtually unheard of two decades ago. These include:

- **Theft or manipulation of sensitive or private information, such as financial or health records**
- **Computer viruses that can destroy data, damage hardware, cripple systems and disrupt a business' operations**
- **Computer fraud**

Adler Insurance Brokers works with leading cyber risk insurers to develop cyber liability insurance and cyber risk protection for Internet and network exposures, including:

- **Liability: privacy and confidentiality**
- **Copyright, trademark, defamation**
- **Malicious code and viruses**
- **Business interruption: network outages, computer failure**
- **Attacks, unauthorised access, theft, website defacement and cyber extortion**
- **Technology errors and omissions**
- **Intellectual property infringement**

Speak to one of our brokers today to identify the risks in your business systems and the measures you can to reduce your exposure.
